

WELDING CONSULTAN SERVICES FOR VALVES INDUSTRY

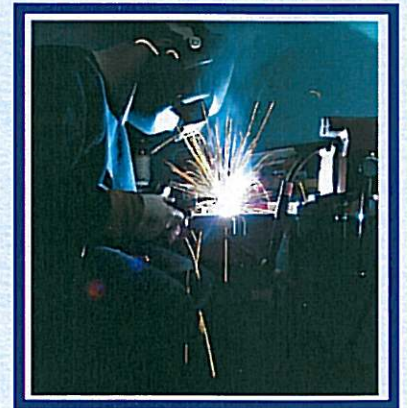

Fornari Welding Tecnology s.r.l. is a Company specialized in advising and training in Welded Structures field.

Our trainers are certificated by **EWf** (European Welding Federation) and **IIW** (International Institute of Welding), with the qualify of **EWE/IWE** (European / International Welding Engineer).

Fornari Welding Tecnology is nationally well known for its activity in skilled technical advising and for their consolidated theoretical and practical courses for operators with the grant of a qualification certificate; according to specific demands the courses deal with technology for all welding processes, metallurgy of welded joints and all the problems concerning welded structures planning and manufacturing.

Other services that *Fornari Welding Tecnology s.r.l.* can also offer are:

- **editing of Welding Books, all the documentation needed to satisfy specification enforced by norms and codes, together with all the client demands;**
- **support to obtain the qualification of welders and soldering operators according to EN norms and ASME Code Section IX;**
- **support to obtain the welding procedures qualification according to EN/ EN ISO norms and ASME Code Section IX;**
- **support to obtain quality requirements for welding applications in compliance with EN ISO 3834.**

Particular attention has always been taken for chemical and petrochemical sector and more specifically for valves field, both in construction of welded valves and both for corrosion and hardfacing overlays done by the welding process.

Fornari Welding Technology s.r.l. operates as a valid support for the companies involved in this market, organising personal training courses not just for welding operators but also for Technical and Quality department Staff.

The courses programs deal with metallurgy of base alloys, with different types of welding consumables connected with all the welding processes.

Particular attention is dedicated also to different applicable norms (ASME-AWS-API-EN ISO).

Clients might request our advice for all the documentation related to the commission, for the editing of Welding Procedure Specifications (WPS), the planning of the Welding Procedure Qualifications (PQR) and of the welders and soldering operators.
